

# Family of Drains

## AVSC

Engineered for maximum heavy debris removal. Includes secondary level of protection and fits flush to the floor. Available in single and dual connections with hydrostatic connection, standard or fillable Pebbletop/Tile cover.

## PDR2

NSF Approved. The PDR2 provides superior heavy debris removal in the 10" class of drains. Safety baffle provides secondary level of protection. Floor installation only. Excellent for deep end pools or basins.

## Full Circle Main Drain

With a fit and finish that is flush to the floor of the pool or spa, the Full Circle Drain eliminates any 'toe-stub' hazard that is inherent with most conventional drains, while preserving the beauty of the pool finish.

## Debris Catcher

Provides heavy debris removal in the 10" class of drains. Comes with or without the Sunlid to provide additional flow rate, if desired.

## Sumpless

This anti-vortex drain provides the ultimate in protection and flow rate. Sumpless design provides for installation with or without a sump. Rated for 170 GPM floor and wall at 1.7 fps. Fits existing Paramount SDX Frame.
